

SOLAR MAX BRONZE

The magnificent colors of the Red Rocks of Sedona, a beauty that is unforgettable. Our Sputter technology, the most advanced metal deposition method available in the world today, is the reason for the outstanding window films series "Solar Max Bronze". This film is designed to bring rich color to your windows and provide the clearest application that will enhance your views.

"Solar Max Bronze" is a product that is designed to reject an extraordinary amount of heat with a minimum reduction of the natural light coming into your rooms. It also rejects 99% of the ultraviolet that contributes to the fading of your drapes, furniture and carpets.

This film has a Special Scratch Resistant Coating to reduce probability of any damage due to cleaning, further providing you peace of mind with your choice of *MaXPro* Films.

With "Solar Max Bronze" the windows of your home will become energy efficient, reduce glare and lower your air conditioning bill. No more will you experience "Hot Spot's" or uncomfortable rooms.

The finest Guaranteed Lifetime limited product warranty is provided for home application. Ask your professional installer about our other warranties that are included for certain Insulated Glass windows. With *MaXPro* "Solar Max Bronze" you will be confident you made the right choice for years to come.

"Solar Max Bronze" is more than just comfort and beauty, it is peace of mind for you, the homeowner.

Ask your professional installer for information on the choice of products in the Pinnacle Series "Solar Max Bronze."
